

## LUX METER DT-73L

**APPLICATION:** DT-73L is a Light meter is a precision instrument that is used to measure illuminance (Lux, foot candle) in the field.

### FEATURES:

- Silicon Photo Diode Sensor with a Spectral Response Filter Fully Cosine Corrected.
- 4 Measuring Ranges
- High accuracy and rapid response

### SPECIFICATION:

RANGE	ACCURACY	RESOLUTION
0-200000LUX	$\pm 4\% \pm 10d (<10,000\text{Lux})$	0.1LUX/0.01FC
0-20000FC	$\pm 8\% \pm 10D (>10,000\text{LUX})$	

- Backlit LCD Display
- Low Battery Indication
- Auto Power-off (disabling option available)
- Overload Indication
- 4 Measuring Ranges in both Lux/FC
- High accuracy and rapid response
- MAX/MIN mode
- REL measuring mode
- Data Hold mode
- Lux/FC unit switch
- Backlight can turn on and turn off
- Range switch
- Auto and Manual range selection
- Power Supply: 3 x AAA 1.5V Batteries.
- ACCESSORIES: User Manual, 3 x AAA 1.5V Batteries.
