

MOISTURE METER DT-129

APPLICATION: DT-129 is a conductivity moisture instrument designed for use in wood, measuring the moisture level in sawn timber (also cardboard and paper) and hardened materials (plaster, concrete, and mortar). The instruments have an average adjustment for European wood, based on a wood temperature of 20°C.

129B is with various professional remote probes.

FEATURES:

- Large LCD display
- Automatically Temperature Corrected (ATC) Readings when used with the temperature probe
- Readings with Moisture Probe or Hammer Electrode
- Readings with Integral electrode Pins
- Size (HxWxD): 180mm x 50mm x 31mm
- Weight: 175g
- Battery: 2x1.5V AAA batteries

SPECIFICATION:

Measuring principle	Electrical resistance
Electrode length	8mm
Electrodes	Integrated, replaceable
Measuring range	Wood: 6-99.9%
Accuracy	Wood: ±1%
Temperature measuring	0-60°C
Ambient temperature	0-40°C
Ambient humidity	0-85%

ACCESSORIES:

2x1.5V AAA batteries, Gift Box with Carrying Case
